Preconception Health Care Tool | Set-Up Guide for Telus PSS

About the Telus PSS EMR-Integrated Custom Forms Package

The Preconception Health Care Tool custom forms package provides users with the tools to screen patients for preconception, and when necessary, counsel and provide patients with management advice, resources, and services.

The Preconception Health Care Tool custom forms package includes the following files:

- CEP Providers - Preconception Health Care Tool.cfm
- CEP Providers Preconception Tool Follow Up Reminder.srx
- CEP Providers Preconception Tool Follow Up Search.srx

The following instructions will help guide you through: (1) importing the CEP Providers - Preconception Health Care Tool; (2) installing the CEP Providers - Preconception Tool Follow Up Reminder that sets a Reminder flag in the patient's CPP to follow-up/continue screening at your text visit; and (3) installing the CEP Providers - Preconception Tool Follow Up Search that allows you to run a search for patients that have been flagged to follow-up /continue screening.

Step 1: Import the Custom Form in Telus PSS

To import the required custom forms complete the following steps:

1. Open Telus PSS and select Records on the main dashboard:

In the Records window, select "Settings" \rightarrow "Edit Custom Forms": 2.

3. Select "File" \rightarrow "Import Form(s)":

- Forms . File New Custom Form. ЖN Create Encounter As... New Encounter Assistant... ŵЖN Edit Form ЖE Create Form Rename Form ₩R Edit Form Duplicate Form Deactivate Form ЖD Duplicate Import Form(s)... Export Form(s). Oct012015 Show Revision History... Show Deactivated Forms... Referral Restore from Automatic Save Bariatric Registry Ik Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) Bath Ankylosing Spondylitis Functional Index – BASFI Body Surface Area (BSA) calculation with Mosteller formula Done
- 4. Locate the CEP Providers Preconception Health Care Toolkit folder, select the .cfm file and click "Choose":

- Double-check that the form has successfully imported by entering "Preconception" in the Forms library search bar. You should see the following form:
 - CEP Providers Preconception Health Care Tool

Step 2: Import the Custom Reminder in Telus PSS

To import the Telus PSS custom reminder complete the following steps:

- 1. Open Telus PSS and select Records on the main dashboard:
- In the Records window, select "Settings" \rightarrow "Edit Reminders": 2.

3. Select "Edit" → "Import Reminders":

Locate the CEP Providers - Preconception Health Care Toolkit folder 4. and select the CEP Providers - Preconception Tool Follow Up Reminder.srx file and click "Choose":

5. Double-check that the reminder has successfully imported by

Preconception Tool Follow Up Reminder

following reminder:

entering "Preconception" in the search bar. You should see the
