

Session Title: Developing Interprofessional Competency in Education

Presenters: Dr. Janice Harvey
Ms. Heather McPherson

Objectives:

1. To provide participants who are interested in developing or planning IPE initiatives with some guidelines, templates and models.
2. To discuss IP competency and how to team and evaluate within an IP Curriculum
3. To stimulate new learning strategies for IPE

Key Points for Practice:

Integrating interprofessional competencies into education and clinical practice offers clinicians opportunities to showcase collaborative efforts but also has some associated challenges. Participants will be provided with both theoretical and practical methods to enhance their contribution in this area of practice. Current research models will be reviewed along with ways to deal with potential challenges inherent in integration of interprofessional competency.
