

Session Title: Using the MSK Exam for High Yield Results

Presenters: Ms. Sharon Switzer-McIntyre
Dr. Howard Winston
Dr. Glen Harris
Ms. Christine Yungblut

Objectives:

- 1) To provide a basic approach to help accurately diagnose a given MSK condition.
- 2) To identify important key tools that each discipline uses in an evidence based exam.
- 3) To apply these principles to Case Reviews with a Panel Discussion.

Key Points for Practice:

- 1) Understanding the various disciplines that practice MSK medicine and their assessment skills.
- 2) To appreciate the similarities, and differences, between various MSK healthcare practitioners.
- 3) To appreciate additional treatments for MSK conditions in relation to more detailed pathology...
- 4) To appreciate a holistic approach to treating MSK conditions, by thinking outside of the box.
- 5) To recognize the goal of improving and/or maintaining a patient's quality of life.
- 6) To stimulate interactive discussion on MSK assessment techniques for Interprofessional care.
- 7) To learn the jargon of MSK conditions and how to communicate with other disciplines/team members.

Resources:

- 1) Powerpoint Presentation
- 2) Panel Discussion
