

Project Manager

The Centre for Effective Practice (CEP) aims to close the gap between evidence and practice for health care providers. The CEP is one of the largest independent knowledge translation organizations for primary care in Canada. It brings together knowledge, evidence, expertise and resources to ensure frontline providers have the information they need to deliver high quality care and improve patients' health outcomes. In Ontario alone, its work reaches over 16,000 healthcare providers each year through established relationships with key organizations, medical schools, colleges and associations.

As a manager, the successful candidate will take on a leadership role with project teams and clients involving the coordination, implementation and monitoring of activities in accordance with assigned deliverables. With strong interpersonal and project coordination skills, the successful candidate will be a key member of the team, supporting provincial and national level projects with the goal of delivering every project on time, within budget and within scope. The nature of CEP's work requires an individual who is able to work on multiple projects in a fast-paced work environment with competing deadlines. This is a mid-senior level position within the organization. CEP is looking for a candidate with strong management skills and with the experience working in health care necessary to understand the needs of our clients and design solutions that build from best practice.

Responsibilities

- Takes a leadership role in the design and execution of projects including defining project scope and objectives, maintaining project documentation including project work plans, and revising as appropriate to meet changing needs and requirements.
- Establishes and maintains strong internal and external relationships with clinical leads, working groups, associations, partners and key stakeholders.
- Builds relationships with CEP colleagues, and government and healthcare representatives to remain current on industry best practices and emerging issues and trends.
- Manages project budgets and allocates funds in collaboration with the Project Lead.
- Oversees and contributes to the development of final deliverables including reports, presentations, etc.
- Contributes to all other duties related to project completion as required.

Qualifications

- Undergraduate or Graduate degree or certificate in healthcare related discipline, life sciences, project management or other relevant field, or equivalent combination of education and experience.
- Minimum 3 years related project/program management experience.
- Understanding of the Canadian healthcare system or experience in healthcare organizations.
- Excellent written and oral communication skills.
- Demonstrated ability to successfully lead, organize and deliver complex projects, utilizing project management techniques.
- Demonstrated ability to effectively lead a multidisciplinary team in delivering complex healthcare
